

# Making a Deck Template for Antique Boats that have no Windshield.

## Step 1

Stand a piece of cardboard on the deck from one side to the other and cut out the deck shape in the base of the cardboard.

## Step 2

**We will take your templates and compare them to existing molds and try to form a shield as close as possible to the templates you provided.**

**You will have to make your own Aluminum frame At the top with  $\frac{1}{4}$ " x  $\frac{1}{4}$ " U-channel you can get at home depot.**

**You can secure the shield to the deck with a Taylor Made rubber deck seal.**

**Here is a link to purchase it:**
